

Why Upgrade your BQ Production to Masterbill Elite?

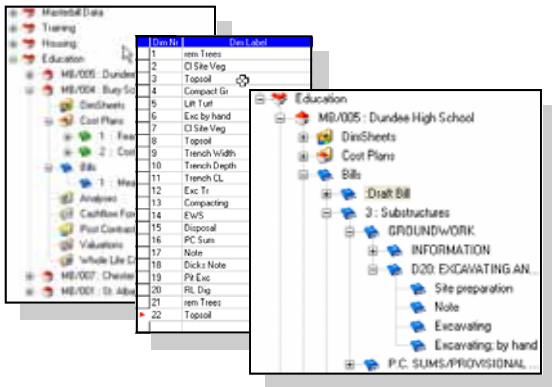

In case the benefits provided by the combination of five of our previous products are not enough to convince you to upgrade we have compiled a list of reasons why we think you will want to upgrade your BQ Production to Masterbill Elite.

Reason 1: Improved Performance

By tapping the power of Microsoft SQL Masterbill Elite can generate even the largest of Bills in a matter of seconds - the result, no more cogs!

Reason 2: Expanded Navigation Tools

A whole new user interface includes a new Navigation Bar, Dimlists and Bill Tree navigation tools to ensure moving around the system is quicker than ever.

Reason 3: Enhanced Usability

Having noted the suggestions of our Masterbill³ users Masterbill Elite boasts an increased variable length and cascading calculations (i.e. sidecast in timesing, timesing in sidecast, etc.)

Reason 4: Extended Pricing Options

Masterbill Elite goes beyond the standard 'all-in rate' pricing of other systems and provide the user with the option of creating two levels of rate build-up.

Reason 5: Increased Bill Formatting

New and improved Bill templates and Headers and Footers make it easier than ever to give your document a 'distinctive look'.

Reason 6: Expanded Matching Prices functionality

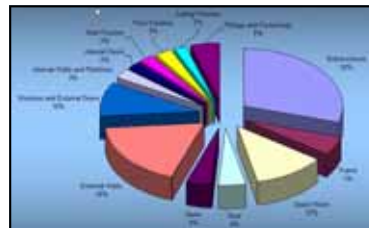

Masterbill Elite incorporates the ability to 'match' prices to multiple previous tenders to 'fill the gaps'. Where a user has taken advantage of the price build-up function the full build-up is copied as part of the process.

Reason 7: Flexible Documents

The increased use of Schedules/Descriptions of Works and the requirement to incorporate Preliminaries and Preambles into the system has resulted in the ability to create a 'Flat' Bill by simply typing, copying or importing items direct onto the page.

Reason 8: Greater Cost Analysis Functionality

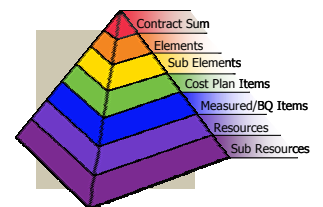

Never before have Masterbill users been able to analyse,

display and compare their cost data in this detail. With an all new graphics capability we are sure users will soon be impressing their clients with the results.

Reason 9: Unparalleled re-use of data

Masterbill Elite is designed with data re-use in mind and enables the user to re-use any previous quantities, prices, bill items or analyses in future projects at the click of a button.

Reason 10: Continuity of Data

Masterbill Elite has re-defined the rules on re-using data so what better way than to start your very own Cost Information Database with the data you have recorded in Masterbill³. Not only will you benefit from the standard library of descriptions but you will also benefit from all your previous bills and prices.
